Deepak Yadav

DevOps Engineer | Mumbai, India | +91 932 024 1574 | yadavd4631@gmail.com | http://portfolio-deepaky.vercel.app | linkedin.com/in/yadavd4631 | github.com/yadavd4631

Summary

DevOps engineer at Zoos Global (Datadog implementation partner) working on AWS infrastructure, Kubernetes/EKS, Terraform, and observability. Hold three Datadog certifications: Fundamentals, Log Management and APM & Distributed Tracing. Prior production software engineering experience (React, Node.js, MongoDB), which helps me debug across app and infra layers.

Skills

Cloud: AWS (EC2, VPC, IAM, S3, Route 53, EKS, CloudWatch , Lambda, SQS, SNS, RDS) · GCP · Azure
Containers: Kubernetes · Docker · Helm
IaC & Automation: Terraform · Ansible · Bash
CI/CD: GitHub Actions · GitLab CI/CD · Jenkins
Observability: Datadog (logs, metrics, monitors, dashboards, APM) · Kibana
Linux & Networking: SSL/TLS · CORS · DNS · Nginx · Ubuntu
Development: JavaScript · MongoDB · Node.js · React.js

Certifications

Datadog Fundamentals July 2026 - July 2029

Datadog Log Management Fundamentals August 2026 - August 2029

Datadog APM and Distributed Tracing Fundamentals August 2026 - August 2029

Experience

Zoos Global **Mumbai, Maharashtra, India**
DevOps Engineer June 2026 - Present

- Deploy and tune Datadog monitoring (monitors, dashboards, log pipelines) for client environments as a Datadog implementation partner.
- Rolled out Datadog agents across Linux fleets using Ansible, replacing manual per-server setup.
- Wrote reusable Terraform modules for IAM / EKS / networking and applied them across multiple environments.
- Diagnosed EKS failures (ImagePullBackOff, node readiness, IAM and subnet misconfig) and documented fixes for recurring cases.
- Traced production incidents across AWS, Kubernetes and application logs, with fixes applied under change control.
- Supported CI/CD pipelines (GitHub Actions, GitLab, Jenkins) with Docker, Nginx, SSL/TLS and DNS setup.

Plootus (AI-Powered SDR Platform)
Frontend Engineer April 2025 - June 2026

- Executed a zero-downtime production domain migration from v1.plootus.ai to plootus.ai on AWS Route 53, managing DNS, SSL, CORS, OAuth redirect URIs, and deployment cutover.

- Worked on AWS-based deployment workflows alongside Node.js/Express and MongoDB services, supporting production rollouts of customer-facing features. Integrated Claude and Gemini APIs into campaign and agent management flows, including real-time polling on LLM responses.
- Authored TRDs for Prospect Hub v2 (Accounts, Insights, Smart List Builder) to align founders, PM, and engineers on scope and rollout before implementation.
- Shipped React/Tailwind interfaces for the AI voice-agent platform, including the AI Campaign Management UI (CMAB Phase 2) and Campaign Hub redesign.

InStat IH

Frontend Developer (titled Elite Projects Analyst) April 2024 - December 2024

- Owned frontend development across sports-data product surfaces, building and maintaining responsive React interfaces used in day-to-day analyst workflows.

Projects

Asterisks - Gym Management SaaS

asterisks.app | Co-founder / Engineering | February 2026 - July 2026

- Built and shipped a multi-tenant gym management SaaS (WhatsApp-native, React + C# backend) for small Indian gym owners; owned product architecture, deployment and hosting decisions.
- Integrated WhatsApp Business Cloud API and deployed the backend on Azure App Service with Azure SQL.
- Reached paying early customers before winding the product down.

Education

Maharaja Agrasen Himalayan Garhwal University (MAHGU) January 2023

Master of Computer Applications (MCA) | Computer Applications

Relevant coursework: Web Technologies · Database Management Systems · Software Engineering
