Front End Engineer | Mumbai, India | +91 93202 41574 | yadavd4631@gmail.com | <http://portfolio-deepak.vercel.app> | [linkedin.com/in/yadavd4631](https://www.linkedin.com/in/yadavd4631) | github.com/yadavd4631

Summary

Frontend engineer building production AI-integrated SaaS at Plootus, an AI voice agent platform for SDR teams. Ship customer-facing surfaces in React, Tailwind, and Framer Motion, with hands-on integration of Claude and Gemini APIs into campaign and agent management flows. Comfortable extending into backend work - REST API design, MongoDB data modeling, and AWS deployment - and authoring TRDs to align engineering before implementation. Early team member experienced in fast-moving startup environments with direct founder, PM, and senior-engineer collaboration.

Skills

Languages: Javascript · HTML · CSS

Frameworks & Libraries: React.js · Tailwind CSS · shadcn/ui · Framer Motion · Express.js

Backend & Data: Node.js · MongoDB · REST API design · Data Modeling

AI Integration: Claude API · Gemini API

DevOps & Tools: Git · Github · GitLab CI/CD · Vercel · Netlify · AWS Route 53 · Firebase

Engineering Practices: TRD authoring · Cross-Functional Collaboration · Code Review

Experience

Plootus (AI-Powered SDR Platform)

Frontend Engineer

April 2025 - Present

- Architected and shipped CMAB Phase 2 AI Campaign Management UI - pre-call workflow with paginated script generation, real-time polling on LLM responses, performance heatmap, and prospect detail drawer; moved campaign setup from manual scripting to an AI-assisted flow.
- Redesigned Campaign Hub with health indicators and a mode-first creation flow (Normal vs AI Managed); led the frontend architecture separating agent-as-template from campaign-as-instance across a multi-tab Agent Hub detail page.
- Rebuilt the company suggestion system from Fuse.js to an event-driven Jaro-Winkler matcher backed by a persistent MongoDB collection, improving match relevance and reducing lookup latency.
- Converted the marketing landing page from static HTML to React with Framer Motion animations; built an animated AI-avatar login experience (cursor-reactive eyes, voice-agent theming).
- Executed a production domain migration from v1.plootus.ai to plootus.ai on AWS Route 53 with zero downtime managed DNS, SSL, CORS, OAuth redirect URIs, and deployment cutover.
- Authored TRDs for Prospect Hub v2 (Accounts, Insights, Smart List Builder), aligning engineering on scope before implementation.

InStat IH

Frontend Developer (titled Elite Projects Analyst)

April 2024 - December 2024

- Owned frontend development across sports-data product surfaces, building and maintaining responsive React interfaces used in day-to-day analyst workflows.

Projects

Asterisks- Gym Management SaaS

Co-founder, in progress

- Building a multi-tenant gym management platform with a C# backend developer and a domain-expert trainer. Owning frontend architecture and product decisions; pilot deployment live at Iron Forge Fitness.

Education

Maharaja Agrasen Himalayan Garhwal University (MAHGU)

January 2023

Master of Computer Applications (MCA) | Computer Applications

Relevant coursework: Web Technologies · Database Management Systems · Software Engineering
